Abstract of JP 10091369 (A)

PROBLEM TO BE SOLVED: To make it possible to delete different kinds of printer drivers by one kind of a deletion software. **SOLUTION:** A host device which can control printers individually implements the printer driver deleting method for deleting an arbitrary printer driver between printer drivers 71 and 72 stored in a specific storage location 7 to previously add characteristic deletion information 74 for specifying the printer driver to be deleted according to specification to the printer drivers 71 and 72 stored in the specific storage area 7, and when the printer driver to be deleted is specified, the host device specifies and deletes the printer driver to be deleted between the printer drivers according to the description contents of the characteristic deletion information 74.
